2. The following is an examiner's statement of reasons for allowance: Prior art fails to show an electrically resistive element coupled to the generator and disposed in the compressor upstream of the outlet portion in the normal direction of airflow to selectively dissipate a portion of the generated power as thermal energy in the air channeled through the compressor to the outlet portion.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
